WHITE PAPER

FlokiCoin is a decentralised token on BSC blockchain. Our mission is to recreate modern community driven by digital platform in a devolved manner.

FlokiCoin community recognised that nationally and globally calculated traditional economic stability based on inflation and deflation of mainstream currency that control our livelihood and creates social disparity for generations, when one nation overdevelops and progress in their own economic sector and others under developed or under produce their wealth.

This monetary inequality continues for the past few generations where people being forced to concentrate of rich , fame and wealth in one part of the planet , and lack of development and high inequality in the marginal regions.FlokiCoin supports decentralised community based platform without a third party control to create more equal distribution of people wealth and resources on a global scale.

That's why 10% of FlokiCoin will be donated to 2 charity organisations across the globe to fight against global warming . Recently we have witnessed - Lytton, a village in British Columbia, became the first place in Canada to record a temperature above 113 degrees Fahrenheit on Sunday, with the thermometer hitting 116 degrees. That's why we love Elon Musk who started to show the world and business leaders that together with innovative technology like modern electric car , satellite and space mission can change the world for good and find another planet for our forever exitance .

FlokiCoin will invest in our food chain by supporting farmers in poorer countries and work with 2 non profit originations to save endangered species .

FlokiCoin community accepted that there are not many or shall we say adequate computer coding education system across the world therefore we want to create a global online platform where children from all backgrounds can learn computer coding free of cost between age 12-18 . All of this will create a FlokiCoin community where we can live without social disparity between us and live as more equal.

FlokiCoin was deployed on 4th of July , 2021 and the max supply is 1 Sextillion . We don't believe on pyramid offer to attract our holders to invest in FlokiCoin , instead we have decided to look into this in an intuitive way to start a decentralised community project with true purpose of charitable, technology and educational advancement to bring stability between in our traditional and modern economic and social system.

/////////////////////// MISSION

**Donate
10% FlokiCoin to 4 global Charities chosen by Holders Vote
5% to support Space Mission**

**Invest
5% FlokiCoin for free online coding education platform for children age between 12-18**

Breakdown of 100% FlokiCoin Distribution
- 10% Donation for good causes
- 5% for Space Mission
- 5% for Free Coding Education
- 40% for public access
- 5% for marketing and Liquidity
- 35% Automatic and Manual Burn

**Fight Against Global Warming
Invest in our food chain
Invest in space mission
Invest in free computer coding education**

**40% FlokiCoin will be availbe for Trade
5% for marketing and liquidity
35% FlokiCoin Will be Burned**

/////////////////////// Controversial Framework RIGHT or WRONG

It's time to take digital currency platform seriously as traditional system with fiat money as legal tender doesn't provide equitable distribution of global wealth due to lack of central of similar economic developments across the continent and regions , high business costs and a wider perception that the certain people, nations and market are not a viable target groups .

That's why here at FlokiCoin we believe through centralised and decentralised digital currency will provide basic human needs by creating community driven economic platform . We all know our current wealth system and in the form of fiat money is created by deposits whenever the traditional fiat holders make a loans .

FlokiCoin community aim to use same principle in a decentralised and centralised digital platform without third party involvement and the community members are the sole owner of the economic system with an array of products and services defined by our community primary mode of operation.

Our aim to go back to such appropriate community based global economic system where decentralised and centralised digital economic system will create social,ecological as well as economic measures. We want to see a public lead consciousness investment where community credit system and groups will determine of where and how digital money spend , or where the credit goes and take part of decision-making . We want to move way form the private matter under the current economic system.
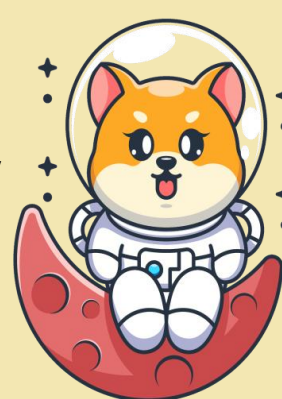

/////////////////
Futuristic FlokiCoin

We want digital currency to take lead on the future financial system where CenFi & DeFi will allow people to lend and borrow between peer to peer directly without intermediaries.

This way community members can have similar services offered by their traditional financial sector but hold the terms of their own.

That's why FlokiCoin is an ERC20 token as an experimental project led to a sister token announcement in the very near future called "BRITKOIN".

FlokiCoin community will launch FlokiCoin Swap by then end of this year and it's most ambitious project is yet to come which is to work with best developers in our generation to create a proof of stake (POS) coin used by renewable energy .

The development of this key framework will give us much quicker, easier, and simplified decentralized platform to have better stable digital currency that meets public and administrative expectation .

/////////////////
Votes & Survey

Votes

Each FlokiCoin Holder will automatically become Flocky community member, and each member has one vote regardless of their amount of FlokiCoin in the selection process to choose over 40 charity organisations across the globe to make our planet a better place to live and keep it fit for human habitation for the future generations to come .

Voting rights are proportional to the number of wallets owned, with a maximum of 5 votes allowed per community member.

Survey

FlokiCoin team will carry out baseline mass survey every six months amongst holders to learn about the holders view and ideas to develop it's marketing and futuristic FlokiCoin strategic plan making the community more inclusive.

Our aim is to do gap analysis that measures and monitors the level of inclusion in our community that help to reduce inequality and injustice that can be over comed with togetherness.

Loyalty Reward
Holders earn 5% of each FlokiCoin transaction . That means you will see FlokiCoin in your wallet grow forever by just holding them .

Liquidity LockedFund
Each FlokiCoin transaction generate automatic 5% LP and majority of Liquidity fund is locked and some burned automatically

Automatic & Manual Burn
FlokiCoin reward holders by burning 5% of every 20% market trade. FlokiCoin also burn with every transaction automatically. The total number of FlokiCoin burned is featured on our website

Our Flokinomics

FlokiCoin aims to create decentralised COMMUNITY to allow its holder and non profit originations to trade assets by swapping it's tokens without relying on third party . We want to take Defi platform into the next level and truly make it outstanding community credit system and make true difference in our community and our planet.

Finally "FlokiCoin" inspired by ELON MUSK's shiba dog and we love ELON, DOGECOIN ,BTC,BNB AND ETH. Regards – RIKU
